

Member Website Program

ASE's website is the hub of an Internet community focused on embalming service professionals. It has been developed to meet their unique needs and the needs of the families and communities that they serve. The American Society of Embalmers, in cooperation with ProAccess have joined together to establish a community within the Internet to promote the common interests of ASE association members. These aren't cookie cutter websites. Each of the packages below includes a full-featured web presence with a website that is **custom designed** for each ASE member.
